WHAT'S THE KEY BENEFIT OF SOHOBLUE?

It's a COMPLETE security solution in one box – cutting complexity and saving money.

DOES SOHOBLUE COME WITH ALL THE REQUIRED UTM SOFTWARE?

Yes. Unlike products from other manufacturers it comes complete with a 12 month subscription to all the UTM software together with subsequent updates throughout the following year. These updates are automatically installed – again a key differentiating feature of SoHoBlue.

DOES SOHOBLUE COME WITH HARDWARE SUPPORT?

Yes. Unlike other products, it comes complete with a 12 month subscription to a 'next business day hardware replacement' service. Your guarantee should the hardware fail. This is an expensive extra from other suppliers.

IS SOHOBLUE EASY TO INSTALL AND MANAGE?

Yes it's easy to install and manage. Alternatively, you can use a SoHoBlue certified installer to configure and manage your unit.

HOW DOES SOHOBLUE PERFORMANCE COMPARE WITH PRODUCTS FROM OTHER SUPPLIERS?

SoHoBlue models outperforms all equivalent competitive products in terms of throughput for UTM, VPN and firewall. In addition, SoHoBlue units are far more cost-effective in regards to initial purchase price, software costs and hardware support.

MY ISP CHECKS FOR VIRUSES – WHY SHOULD I RUN ANTI-VIRUS ON A SOHOBLUE?

ISPs cannot check for browser-borne viruses or emails between colleagues on the same site, most don't check for spyware and none for intrusions, or malware from other ISP accounts you may have – whereas SoHoBlue can!

WHAT DOES THE TERM 'UTM STANDARD' MEAN?

UTM Standard is our terminology for key UTM facilities and is available for all SoHoBlue models. It is designed for users who don't need all the features offered by UTM Premium.

WHAT DOES THE TERM 'UTM PREMIUM' MEAN?

UTM Premium is our enhanced UTM software for NetPilot models and also available on SoHoBlue-100. This pack includes all the security elements available.

WHICH UTM PACKS COME BUNDLED WITH NEW SOHOBLUE PRODUCTS?

SoHoBlue models come with 1 Year UTM Standard subscription for the appropriate number of users for the particular model type – e.g. SoHoBlue-25 is licensed for 25 users.

WHAT IF I WANT TO CONNECT MORE PCs THAN I AM LICENSED FOR?

If you need to attach more users, contact us for costs.

WHAT ARE SOFTWARE & FIRMWARE UPDATES?

Users who do not subscribe to a UTM pack should subscribe to Updates to obtain the latest system versions to maintain firewall security.

ARE THERE ANY TRADE UP DEALS AVAILABLE?

Please check www.netpilot.com and www.sohoblue.com for details of any current incentive deals.
